## **GENERAL TERMS AND CONDITIONS**

This document, together with the attachments appended hereto, constitutes the Terms and Conditions for the Subcontract between the parties, and acceptance is strictly limited to the terms and conditions contained herein. Additional or differing terms, conditions or limitations of liability proposed by the Seller, whether in a quote, acceptance or delivery document shall have no effect unless accepted in writing by Buyer. In particular, any limitation of liability or disclaimer of warranty is expressly rejected. Agreement by Seller to furnish the goods or services to these terms and conditions, or Seller's commencement of such performance or acceptance of payment shall constitute acceptance by Seller of these Terms and Conditions. If any of the clauses are not applicable by their terms, they shall be self-deleting.

### 1. SUPPLIER QUALITY, FIRST ARTICLE INSPECTION, AND QUALITY MANAGEMENT SYSTEMS

Suppliers shall conduct First Article Inspections that meet the requirements of AS9102 for any parts built to L3Harris-BCS specifications, source control drawings, including modifications to COTS parts. To review Buyer's Supplier Quality Requirements (SQR), please refer to website: <http://suppliers.bcs.l3harris.com/quality>.

### 2. MERCURY CONTAMINATION

Mercury content of article furnished under this order shall not exceed the OSHA permissible exposure level.

### 3. NAME CHANGES

L3 CSW, through acquisition and merger, has had several previous affiliations. Any drawing or document reference to Sperry, Unisys, Paramax, Loral, or Lockheed Martin should be interpreted as L3 CSW.

### 4. FURNISHED MATERIALS/LIABILITY

If one or more items of Government property (*See FAR 45.101*) are furnished in support of this contract, the supplied items shall be subject to the monitoring and reporting requirements of L3 CSW procedure P-335, GPM-06, Subcontract Control, which will be furnished by Buyer upon request.

### 5. NONCONFORMING AND SUSPECT MATERIAL

In the event nonconforming material is received by Buyer, a Supplier Corrective Action Report (SCAR) may be issued in conjunction with any nonconforming goods. Such SCAR must be returned to the requestor within 30 days of issue, or Buyer may withhold payments for the associated Purchase Order until such SCAR is received.

If, anytime during the performance of, or after shipment(s) made against this Purchase Order, Seller becomes aware of or reasonably suspects that a product contains a component subject to a recall notice, warning alert, GIDEP alert, or any other type of concern regarding the authenticity, quality, safety, process integrity, specification compliance, or other type of nonconformance, Seller shall immediately notify Buyer of such problem or nonconforming goods shipment(s). Seller shall provide the following information as part of the notification: Buyer Purchase Order number; Buyer part number; Seller part number; quantity shipped, date(s) of shipment; serial number(s), if available; the identified nonconformance and the SCAR that will correct the nonconformance and prevent future shipments of nonconforming goods. After submittal of the above required information, Seller may apply for a specific waiver from L3 CSW requesting L3 CSW to accept the nonconforming goods.

#### 6. SPECIALTY METALS

Seller, by acceptance of this Purchase Order, certifies that any goods herein that are required to comply with the "Specialty Metals" requirements in 10 USC 2533B and DFARS 252.225-7009, Restriction on Acquisition of Certain Articles Containing Specialty Metals, are compliant and that the seller shall maintain the required manufacturer's certifications and shall make them available to Buyer upon request. Such certifications shall be retained at Seller's facility per the record retention requirements of FAR Subpart 4.7

#### 7. STANDARD OFFSET PROVISION

To the exclusion of all others, Buyer or its assignees shall be entitled to all industrial benefits or offset credits that may result from the issuance of this Purchase Order / Subcontract. It is Buyer's intent to utilize any industrial benefits/offset credits in support of Buyer's offset obligations and those of its Corporate Affiliates, Prime Contractors, or other business partners. Seller agrees to use reasonable efforts to identify the foreign content of any goods or services that Seller either produces itself or procures from its Suppliers/Subcontractors for work directly related to this Purchase Order/Subcontract. Seller shall provide buyer a written notice every six (6) months documenting whether or not there has been any foreign content related to this Purchase Order/Subcontract. Seller shall provide documentation or information that Buyer or its assignees may reasonably request to substantiate claims for industrial benefits or offset credits.

#### 8. INSURANCE REQUIREMENTS

In addition to the provision stated in the L3HARRIS TECHNOLOGIES, INC. GENERAL TERMS AND CONDITIONS, any work to be performed by Seller for Buyer is also extended to any site designated by Buyer.

#### 9. HAZARDOUS MATERIALS (HAZMAT)

Applies only when Seller's employees are on Buyer's premises: If a hazardous material is brought on Buyer's premises or a site designated by Buyer and there is a possibility of employees being exposed to the hazardous material, Seller shall provide to Buyer a Material Safety Data Sheet (MSDS)/OSHA Form 20 in advance of any work performed and provide sufficient lead- time so that the hazardous material can be evaluated and controls planned. Seller must remove all such hazardous materials and associated empty containers from Buyer's premises or designated site after work is completed.

#### 10. EXPORT COMPLIANCE

Where Seller is a signatory under a Buyer export license or export agreement (e.g. TAA, MLA), Seller shall provide prompt notification to the Buyer Procurement Representative in the event of changed circumstances including, but not limited to, ineligibility, a violation or potential violation of the ITAR, and the initiation or existence of a U.S. Government investigation, that could affect the Seller's performance under this contract.

#### 11. SPECIFICATIONS

All references in any Buyer document or Government specifications (excluding those incorporated in subcontractor's model specifications) incorporated into this Subcontract by reference, shall be deemed to include any and all specifications superseding or supplementary to the specifications so referred to, to the extent that such superseding or supplementary specifications are in effect on the effective date of this subcontract or on the effective date of any incorporating change notice, if subcontractor was furnished or otherwise had been notified of the existence of such superseding or supplementary specifications by that effective date.

#### 12. SUPPLIER PROCESS CHANGE CONTROL

Some or all of the products acquired under this Agreement will be incorporated into higher level assemblies that may be subject to stringent "qualification testing" requirements for critical government applications; even minor changes to Seller's products or processes may necessitate "requalification" or produce unacceptable results in higher level assemblies. Since the impact of any such product/process

change can be most efficiently assessed prior to product integration into higher level assemblies and the potential cost of remediation/retrofit activities for end products deployed worldwide could be substantial, as a cardinal commitment under this contract, Seller expressly commits to: 1) maintain a robust sourcing/quality process for the products delivered hereunder; 2) rigorously comply with the notification requirements specified below; and 3) include provisions with its sub-tier suppliers that are adequate to implement the requirements of this provision.

#### 13. PRIOR APPROVAL – FORM/FIT/FUNCTION ALTERATIONS

Seller will not implement, or otherwise deliver to Buyer, products incorporating any alterations to product form, fit, or function without the express prior written approval of the Buyer. To obtain approval, Seller shall submit to Buyer the Change or Information Request Form (CIR) located at <http://suppliers.bcs.l3harris.com/quality>, under the “Supplier Forms” Tab (SLC-9012). Such approval shall not be unreasonably withheld but shall be dependent upon Seller’s thorough documentation of such proposed changes (including any analysis necessary to confirm continued suitability). Seller’s notification and Buyer’s limited approval of such form, fit or function alterations shall not be interpreted to waive any other contractual requirement(s) or to otherwise relieve Seller from delivering fully compliant products.

#### 14. PRIOR NOTIFICATION

**Material Changes:** Prior to delivering any products incorporating a “material change”, Seller shall provide advance notice to Buyer in sufficient time to reasonably evaluate the proposed change and, if necessary, to place an end-of-life order for the unchanged product, but in no event shall Seller’s notice be less than 30 calendar days. In providing notice, Seller shall submit to Buyer the Change or Information Request Form (CIR) located at <http://suppliers.bcs.l3harris.com/quality>, under the “Supplier Forms” Tab (SLC-9012). For purposes of this clause a “material change” is any alteration to the design, technical specifications, materials, component sourcing, or production process, facilities or location, whether instigated by Seller or its sub-tier suppliers.

**Risk Notification – Product Alerts** Buyer shall be promptly notified whenever Seller becomes aware or reasonably suspects that any product delivered to Buyer is, or contains a component that is, subject to a recall notice, warning alert, GIDEP Alert, and/or any other type of notification or concern regarding product authenticity, quality, safety, process integrity, and/or specification compliance.

#### 15. SPECIAL PROCESS REQUIREMENTS

Suppliers who provide “Special Process” services or products that have been manufactured using “Special Processes” to CSW (Special Processors) are required to have those special processes validated and approved by CSW Supplier Quality. Additional information can be found within the Supplier Quality Requirements document (SQR-001).

Provide a list of all special processes, including subtier processes within the supply base, for consideration of use and authorization to proceed.

#### 16. EXCESS GOVERNMENT OR L3 PROPERTY INCLUDING SCRAP MATERIALS RESULTING FROM REPAIR

a. Excess property including scrap resulting from any and all repairs shall be reported to the Subcontract Manager containing the following data elements upon identification and held until final disposition action is provided.

1. The listing, at a minimum, shall include the following data elements.
  - i. Identification/Tag Number
  - ii. Item Description
  - iii. Date Acquired

- iv. Ownership (USG/L3 CSW)
- v. Property Type (EQ, ST, STE, Mat)
- vi. Accountable Purchase Order
- vii. Physical Location
- viii. Condition Code
- ix. Comments
- x. Hazardous/Sensitive

b. No property, including materials, shall be disposed of without prior consent and direction from L3 CSW.

c. If for any reason the disposition action(s) cannot be carried out by the subcontractor, the subcontractor is required to immediately report the reasons to the L3 CSW Subcontract Manager.

#### 17. COUNTRIES OF CONCERN

Unless authorized in writing by Buyer, Seller and its suppliers, through tier two (tiers from Buyer) in 2026, through tier four in 2027, through tier five in 2028, and at any tier in 2029 and beyond, shall not provide any Items (including without limitation components, subcomponents, and raw materials) or Services sourced from a country listed at 22 C.F.R. 126.1(d) (collectively, Identified Countries). If Seller sources a rare earth element (REE), at any tier and in any year, from an Identified Country producing greater than seventy percent (70%) of the global supply of such REE, Seller shall promptly notify Buyer in writing.

These sourcing limitations apply without regard to (i) commerciality, including Commercial-Off-The-Shelf (COTS); (ii) size or insignificance, even if just an input; (iii) the active or passive nature; and (iv) the electrical, electronic, or electromechanical (EEE) nature.

Regardless of year, Buyer reserves the right to (i) audit Seller's sourcing at all tiers; (ii) reproduce records related to sourcing locations at all tiers; and (iii) direct alternate sourcing at any tier. Seller shall provide access to all relevant records, facilities, and personnel.

If Seller knows, or has reason to know, of a transaction involving sourcing from an Identified Country in violation of the prohibitions herein, then Seller shall immediately notify Buyer in writing.

A violation of the prohibitions herein or a failure to provide any notice required herein shall be a material breach of this Order, entitling Buyer to (i) terminate the Order for default in accordance with the governing terms and conditions and (ii) require Seller, at Seller's cost, to assist Buyer with validation testing and inspection at a test facility of Buyer's choice.

#### **FAR & DFARS:**

When the materials or products furnished are for use in connection with a U.S. Government contract or subcontract, in addition to the General Provisions, the following provisions shall apply, as required by the terms of the prime contract or by the operation of law or regulation. In the event of a conflict between these FAR and DFARS provisions and the General Provisions, the FAR and DFARS provisions shall control.

The following clauses set forth in the FAR and DFARS in effect as of the date of the prime contract are incorporated herein by reference. In all clauses listed herein, the terms "Government", "Contracting Officer" and "Contractor" shall be revised to suitably identify the contracting parties herein and effect the proper intent of the provision except where further clarified or modified below. "Subcontractor" however, shall mean "Seller's Subcontractor" under this purchase order.

1. 52.227-3 Patent Indemnity (Commercial Items)
2. 52.232-11 Extras
3. 52.237-3 Continuity of Services
4. 52.242-1 Notice of Intent to Disallow Costs
5. 52.246-1 Contractor Inspection Requirement
6. 252.204-7002 Payment for Subline Items Not Separately Priced
7. 252.225-7980 Contractor Personnel Performing in the United States Africa Command Area of Responsibility (USAFRICOM AOR) (in lieu of DFARS 252.225-7040, Contractor Personnel Supporting U.S. Armed Forces Deployed Outside the United States, as found in L3H's General Ts & Cs)
8. 252.227-7022 Government Rights (Unlimited)
9. 252.227-7032 Rights in Technical Data and Computer Software (Foreign)
10. 252.232-7007 Limitation on Government's Obligation (Over \$100,000)
11. 252.239-7017 Notice of Supply Chain Risk
